Core capabilities

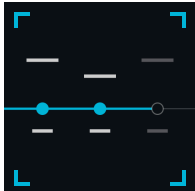

USE ONE, OR ALL FIVE

AI Strategy & Use Case Discovery

Find where AI and automation create measurable value across operations, workflows, decisions, and service delivery.

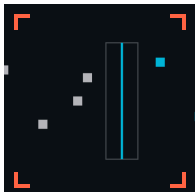

Use case portfolio Business case

AI Readiness & Transformation Planning

Process mapping, data readiness, workforce impact, implementation roadmaps, and change management.

Readiness assessment Phased roadmap

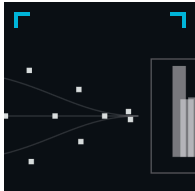

AI Governance, Risk & Compliance

Set the policies, controls, approval workflows, risk management, human oversight, and evidence needed to deploy AI responsibly.

AI policy set and inventory Risk register and controls

Review-ready docs

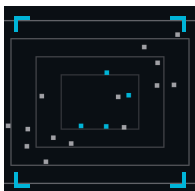

AI Implementation & Operational Integration

Move from plan to execution. Integrate AI-enabled workflows, dashboards, automations, and decision support into real operations.

Capability in daily use Measured results

Handoff and support

Custom Development

When the right tool doesn't exist, XOVA builds it, engineered to run in the customer's own environment.

Purpose-built software Source handoff Sustainment options

How XOVA delivers

- **Mission-first teams.** Operators and builders, matched to the work.
- **Built for your environment.** Inside the systems, data, and rules you have.
- **Governed from day one.** Controls and documentation from the start.
